**8 WEEKS PROGRAM
FOR NURSING REGISTRATION**

Technology-rich, innovative learning environments that focus on outcome-driven practical learning are a key focus for IHM.

The healthcare industry is in an era of transformation, and educators in this sector have to innovate to prepare practitioners for best practices and models of care. This is where an education at IHM truly makes a difference. Bringing together the collective expertise of experienced nurses, academics, and clinicians, IHM courses are delivered by professionals with extensive expertise in on-campus and online learning and teaching.

ANPOBA-RN

The simplified pathway for overseas registered nurses to migrate to Australia.

With the growing demand for Nurses in Australia, there is the need for a comprehensive packaged program that will help overseas qualified nurses to refresh their skills and bring them on par with global standards. They will also need to improve their English language capabilities and soft skills in order to excel in the Outcome-based Assessments that they must pass to gain Nursing Registration and practice abroad.

IHM's Australian Nursing Practice – Outcome Based Assessment (ANPOBA-RN) has been meticulously designed to assist Internationally Qualified Registered Nurses to achieve their dream healthcare career abroad. This course will assist overseas trained registered nurses in gaining a thorough understanding of the practice styles and requirements in Australian healthcare settings, as well as preparing them to confidently take the Australian Health Practitioner Regulation Agency's Outcome Based Assessment process, such as the NCLEX-RN and Objective Structured Registered Clinical Examination (OSCE).
